## Bringing two distinct business parts together

Mercedes-Benz needed to bring together two distinctly different parts of their business – financial services and Mercedes-Benz passenger / commercial vehicles. Flexible floor layouts that accommodate different needs deliver this cohesive feel. An extensive refurbishment provides reception, meeting rooms, staff café, vehicle showroom plus an open plan sales area. The aesthetic (including environmental graphics) and concept for interior spaces references Mercedes-Benz vehicles, and the Mercedes-Benz museum in Germany. Overall, the space strongly represents the innovation of the Mercedes-Benz brand.
